

## ABOUT THIS PROJECT

Using XHTML and an attached CSS file - create a mini site as promotion for the 'save the oceans' campaign by Greenpeace. The main purpose of this project is to give you a chance to play with only the most basic of tags and css rules - to familiarise yourself with the syntax and to get used to handcoding. Aesthetics and design are not important - just focus on the actual code and experiment.

## PROJECT DETAILS

Have a look at this page of the Greenpeace site:  
<http://www.greenpeace.org.uk/oceans>

Using the text and images provided - put together a 3 page mini site to display the given content. Just have some fun while getting your head around the code and practising your handcoding.

## TECHNICAL REQUIREMENTS

- content text article <http://www.greenpeace.org.uk/oceans>
- image use: all images provided as high quality jpgs available for download (29.8MB)
- number of pages minimum of 3 (all pages interlinked)
- external links minimum of 1 back to Greenpeace home page, optional link to article

## SCHEDULE

- start date 8/5/08
- deadline 15/5/08

HAVE FUN . . .
